Hate speech normalization task

Dear All,

We are conducting a survey on hate speech normalization task and need your support for the same. We are exploring the degree/intensity of a hate speech on a scale of [1, 10]. Our objective is reduce the intensity of a hate speech (e.g., 8 to 3, 7 to 4, 9 to 5, etc.). Please note that we don't have objective to convert a hate speech into non-hate speech.

This form has 5 examples. Each example has five sentences representing an original hate speech and the remaining four as the outputs of four hate normalizer systems (i.e., A, B, C, and D). We need following three information from your side.
1. Intensity: Given an intensity score of the original sample, assign an intensity score to each output from a range of 1-10, 10 being highly hateful and 1 being low level of hate.
2. Fluency: Fluency is defined as how fluent an output is considering the syntactic properties of a language. rate each sample on range 1-5, 5 being the highest. E.g., "John is going to Delhi". is a fluent sentence.
3. Adequacy: Adequacy refers to the semantic perseverance properties. Whether desired meaning can be interpreted from the output. E.g., "John is going Delhi." is not a fluent sentence but has a higher adequacy. Also our task aims at the normalization of hateful tweets and not the conversion of hate to non hate, so if a sentence changes the polarity of the tweet, then that can also be taken as a negative case from our intended perspective. E.g., "I fucking hate you", is a hateful tweet, so a tweet with its polarity reversed like "I like you" will not be considered as a normalized version of the original tweet. Instead a normalized version would look like this "I don't like you". So a normalized tweet with its polarity reversed would have a minimum adequacy even if it is fluent.

All the original tweets are assumed to be at the maximum level of adequacy as well as fluency.
If you have any question, please contact us for details.

Thanks for your support.

1.   [Sample 1]

```
Original-:A hoe wants attention a women wants respect.

A: a hoe wants attention

B: A woman wants attention a women wants respect.

C: A  wants attention a women wants respect .

D: A woman wants attention.
```
